At the Nin Salt Works the salt is produced by the sun, sea and wind. The salt from Nin is ecological, therapeutic and biodynamic.

AUTHOR MILENA BUDIMIR

At the Nin Salt Works the salt is not produced by the machines. It is not produced by the man either. The salt is produced by the sun, sea and wind. The salt from Nin is ecological, therapeutic and biodynamic because in its production, besides people, participates diverse wildlife, plenty of beaches and healing mud.

At the Nin Salt Works salt has been produced with love, traditionally, and in coexistence with nature for 1,500 years. For generations the Nin salt fields have been giving the best of the sun, the Adriatic Sea and the wind from Velebit.

Nin produces the original sea salt, unprocessed and as such rich in natural minerals.

Festival is traditionally held in August and it attracts eco-tourists from all over the world.
SALT AT NIN

About Nin

On a small island in the middle of a shallow lagoon the small town of Nin can be found with its old centre, connected to the mainland by two stone bridges. Nin has had an exciting past and today a lovely present. All its stories, all its beauty and natural wealth are here to be enjoyed and to find joy, health and spiritual satisfaction which are so much needed today.

Nature and Man have made this small town very pleasant for a holiday, interesting because of the rich historical field, as well as excellent for health. It is the oldest Croatian royal town, the cradle of the Croatian state. The smallest cathedral in the world and the crown Church of St. Nicholas can be found here, as well as one of the world's most beautiful beaches.
